

**Post-doctoral Position, Department of Microbiology, University of Dhaka**

Applications are invited for a post-doctoral fellow to work in the field viral culture and immunology in a 2-year contract offered by the Microbial Genetics and Bioinformatics Lab, Department of Microbiology, University of Dhaka. The project is financed by the World Bank under the HEQEP Initiative from the University Grants Commission. The major responsibility of the fellow will be to work with biological samples from animal origin, isolate and culture viruses, purify proteins and to construct recombinant proteins in order to simplify diagnostic procedure.

The applicant must possess the following:

1. PhD in Biology from a reputed University with hands-on expertise in molecular biology and rDNA technology
2. Have at least three first-author papers in peer-review journals
3. Willing to work independently and travel extensively on field trip, conventions and training programs
4. Work under pressure and coordinate with team and collaborators
5. Have knowledge of biosafety and biosecurity protocols
6. Able to supervise masters and PhD students

Qualified and enthusiastic candidates should send their CV, Letter of Motivation and a short description of research interest addressed to :

Prof. Md. Anwar Hossain

Department of Microbiology

University of Dhaka

Lab 109, Microbial Genetics and Bioinformatics Laboratory
